Mobi Info Edit – MIE

MIE is the advanced software for multilingual design of texts and graphics. It has been developed in close conjunction with our customers resulting in a user-friendly program with advanced functionality. This software allows users to create texts for both exterior and interior signs, set up route descriptions and manage next-stop announcements. Customized files are quickly and easily transferred to Mobitec's signs and control units. As MIE follows the Windows standard, it is easy to learn. The program uses normal text editing functions such as cut, copy and paste. Several guides help you at every stage of the program. Let the program format the texts, suggest suitable fonts or enter your texts manually. The unique MIE program allows you to handle any language – two in parallel if needed.
